

IMV imaging Academy In-Practice Training

Boost your **equine diagnostic skills** with our in-practice **Fast Localised Abdominal Sonography of Horses** training! Perfect for both **ambulatory** and **clinic-based** veterinarians, this course combines **expert** guidance, **hands-on** experience, and **practical tips** to help you make fast, **confident** decisions in the field.

Theory Session

The training begins with a one-hour theory component which enables you to refresh your skill set and learn how to get the most out of your ultrasound machine. This session also guides you through the FLASH scanning regions, relevant anatomy and common pathologies, highlighting what to expect in each area

Live Demonstration

Our experienced IMV imaging Academy tutors take you on a step by step journey through the scanning windows, highlighting image optimisation and key findings in real time. This session bridges the gap between theory and practice, elevating your confidence prior to beginning your own scans

Practical Training Session

Put your skills into practice scanning live horses in a supervised, relaxed environment. All imaging equipment provided, or use your own! Refine your skills and receive personalised feedback from our expert tutors leaving you fully prepared to apply your newfound skills effectively in real clinical situations

What is the IMV imaging Academy?

We are Europe's largest provider of veterinary imaging CPD. Created by a core team of vets with expertise in diagnostic imaging and education. It is the home to an innovative and leading online learning system designed to provide the best learning experience and learner outcomes.

Our purpose is to provide our clients and the wider veterinary industry with the skills and confidence required to get the most out of their imaging equipment.

What previous learners had to say about our bespoke CPD courses ...

“It was really helpful to go back to basics. The course was presented very well and the practical aspect well explained.”

“Really helpful concise presentation, with loads of practical time!”

“Really great speakers”

“Presentations at the start highlighted the necessary basics for optimising images and what to expect in each scanning region. Practical sessions helped to solidify this knowledge. I now feel confident to take our scanner out and do some FLASH scanning”

“Really enjoyed and would recommend to others. Feel like I learnt a lot that is very relevant and easy to incorporate into my job.”

Terms and Conditions

- Equine IPT price **£350 +VAT per learner***
- 3-8 learners per day, including bespoke options for both **vets and nurses**
- **Mixed abilities** welcome; please discuss this with a tutor (contact below)
